Commentary:

- Greenvale's Gender Pay Gap is significantly lower than the UK average of 18%
- There are no differences in pay rates for different genders occupying equivalent roles.
- The difference in the median bonus figure is explained by the number of female employees who have attracted a service related loyalty bonus.
- 70% of employees working nightshift, which generally attracts a higher pay rate, are male.
- Greenvale is actively seeking to address the discrepancy in male / female employees within the upper middle and upper quartile pay bands, for example 75% of our graduate recruits in the last 4 years are female.
