Product Guide
2021/22

Our Potato Range

Welcome to our latest Greenvale B2B product guide providing details of our current potato ranges. Our experienced and dedicated team is well networked and we have the ability to supply nationally, operating direct from farm, or from our sites in Cambridgeshire and the Scottish Borders.

Our long established partnerships with both UK and overseas growers, ensure we offer our customers the best range of potatoes all year round that delivers on taste, flavour, appearance and consistent cooking qualities.

We have a wide range of varieties to suit all tastes and requirements and importantly ensure we offer consistency. We can supply 100% British grown varieties, many of which are exclusive to Greenvale, including two of our most popular varieties, Jelly and Venezia.

From bulk, to bags, to boxes to pre-pack, our team is ready to help you choose the right variety and format.

All of our potatoes are procured by our Greenvale colleagues and meet all quality, farm assurance and technical requirements so you can be reassured by the fully traceable systems we have and uphold.

We look forward to helping you and hearing from you. Please get in touch with Daniel Nowak on **07841 568645** or Rebecca Elliot on **07501 726122** to find out more and to place your order.
